

Data for Testing InvenPril (Excel or CSV format)

OPTION 1: Only one file

SKU
SKU# (A unique identifier)
DueOut
OnHand
DueIn
Month1Quantity (Forecast for current month)
Month2Quantity
...
Month12Quantity

Optionally, you may include columns to identify SKU families that have minimum order quantities. For example: Color, Style.

OPTION 2: Multiple files

INVENTORY
SKU# (A unique identifier)
DueOut
OnHand
DueIn
(Optional columns to identify SKU families)

FORECAST
Month1Quantity (Forecast for current month)
Month2Quantity
...
Month12Quantity

Instead of a monthly forecast, you may provide a forecast by the week or by the day, or you may provide a list of previous sales instead.

MINIMUM ORDER QUANTITY (Optional)

SkuAttribute, SkuAttributeValue, MinimumOrderQuantity

Example:

Minimum Order Quantities for Color	
COLOR	MINIMUM ORDER QUANTITY
Blue	500
Red	300

Minimum Order Quantities for Style	
STYLE	MINIMUM ORDER QUANTITY
SS Shirt Mens	1200
LS Shirt Mens	2000

This example data calls for a minimum order of 500 for some combination of SKUs whose color is Blue.
